I/O Spoofer

● ● ●

For Android
(Zachary Blake)

Why?

- Your I/O device out-of-service? Use this App as a temporary replacement until you can get a new one
  - "Well that already exists, why choose yours?"

- This app can used as a Keyboard in BIOS, giving Function key control
  - Useful for those in IT professions: allows fast set up of PCs without carrying clunky I/O devices
  - The set up of PCs is usually no more than a few key presses, saving time

But why is it important?

- Ultimately saves time and adds convenience
    - Offers an intermediary solution to a missing device
    - Saves time both at home and on the job
    - Plug-n-Play : No drivers

Early Mock-Up : Toggle between BIOS spoof and OS use
